AMMAR UL HASSAN

Software Engineer • UI/UX Designer • Flutter & Android App Developer

POF Sanjwal Cantt, Attock, Pakistan | (+92) 316 8535370 | ammarrajpoot312@gmail.com | linkedin.com/in/ammar-rajpoot | ammarrajpoot312-boop.github.io/ammar-portfolio

ABOUT ME

Software Engineer, UI/UX Designer, and Flutter & Android Developer with hands-on experience across cross-platform and native mobile app development, front-end and back-end architectures, and responsive web/dashboard design. Skilled in Figma, wireframing, prototyping, and user journey mapping, alongside mobile development using Flutter, Dart, Java, Kotlin, and Android Studio. A fast learner and creative problem solver committed to building simple, functional, performant, and engaging digital experiences.

EDUCATION

BS Software Engineering — University of Haripur *2020 - 2024*

- Developed a strong foundation in software engineering, mobile development, OOP, and UI/UX design.

Diploma in Computer Information Technology — Govt College of Technology, Attock *2016 - 2019*

Matriculation (Secondary School Certificate) — F.G Public High School, Attock *2016*

TECHNICAL SKILLS

UI/UX Design: Figma, Wireframing, User Flows, Prototyping, High-Fidelity UI, Interactive Design, User Research, Design Systems

Mobile App Development: Flutter, Dart, Android Studio, Kotlin, Java, XML Layouts, State Management, REST APIs, Android UI Development

Mobile & Web Design: Dashboard Design, Landing Page Design, Mobile App Design, Website Design, Responsive Layouts

Design Tools & Productivity: Adobe Photoshop, Adobe Illustrator, MS Office Suite

WORK EXPERIENCE

Flutter & Android App Developer — Oxmite Digital Ltd *30/05/2024 – Present*

- Engineered intuitive front-end designs and interactive mobile screens for Android and Flutter applications.
- Developed back-end functionality, local database integration, and integrated RESTful APIs.
- Debugged and resolved runtime errors, boosted performance, and maintained clean, scalable code architecture.

UI/UX Designer — JH IT Zone / Alpha IT Studio *Current*

- Designed user-friendly and visually appealing mobile apps, websites, and interactive dashboards using Figma.
- Created wireframes, user flows, interactive prototypes, and high-fidelity UI designs adhering to modern usability standards.
- Collaborated on real-world projects to improve product usability and deliver human-centered visual experiences.

FEATURED PROJECTS

Vibe – Social Media App (UI/UX Design)

- Designed a modern, engagement-focused social media app in Figma featuring user profiles, a dynamic post feed, direct messaging, and content discovery.
- Built clean navigation patterns and responsive layouts for seamless user interaction.

Figma: Vibe Social Media App Prototype

CarePlus – Healthcare & Medical App (UI/UX Design)

- Designed an intuitive patient care app in Figma with doctor appointment booking, in-app messaging, and patient profiles.
- Focused on accessibility, readability, and empathetic UI patterns for medical workflows.

Figma: CarePlus Medical Center Prototype

Eventify – Event Booking App (UI/UX Design)

- Designed an end-to-end event booking app with event browsing, seat reservation, cancellation management, and digital tickets.
- Built a clean, step-by-step booking flow to reduce friction during seat selection and confirmation.

Figma: Eventify App Prototype

Melody – Music Streaming App (UI/UX & Mobile App Development)

- Designed and developed a sleek music streaming mobile application concept focused on simple navigation and smooth playback.

Figma: Melody Music App Prototype

Wear & Grace – Business Management App (UI/UX Design)

Designed a modern business management app for sales, customer records, loans, payments, investments, and analytics, with clean layouts and user-friendly navigation.

Figma: Wear & □race Design
